Acta Geotechnica

No new issue published.
Reproducibility of Direct Shear Tests Conducted on Granular Backfill Materials
Bareither CA, Benson CH, Edil TB

Development of a True Triaxial Apparatus for Sands and Gravels
Choi C, Arduino P, Harney MD

A New Slurry-Based Method of Preparation of Specimens of Sand Containing Fines
Carraro JH, Prezzi M

Oedometer Consolidation Test Analysis by Nonlinear Regression
Barros PL, Pinto PR

Evaluation of the First Mode of Vibration and Base Fixidity in Resonant-Column Testing
Khan ZH, Cascante G, El-Naggar MH

Monitoring Field Soil Suction Using a Miniature Tensiometer
Cui Y, Tang A, Mantho AT, De Laure E

Suction Equilibration Time for a High Capacity Tensiometer
Oliveira OM, Marinho FA

Characterization of Glyben for Seismic Applications
Rayhani MH, El Naggar MH

A Suction-Control Apparatus for the Measurement of P and S-wave Velocity in Soils
Alramahi B, Alshibli KA, Fratta D, Trautwein S

Effects of Specimen Size and Some Other Factors on the Strength and Deformation of Granular Soil in Direct Shear Tests
Wu P, Matsushima K, Tatsuoka F
1- Analysis of rock–support interaction using numerical and multiple regression modeling
Hakan Basarir
Pages 1-13

2- Application of a multilaminate model to simulate the undrained response of structured clay to shield tunnelling
H. Kien Dang and Mohamed A. Meguid
Pages 14-28

3- A particulate-scale investigation of cemented sand behavior
Y.-H. Wang and S.-C. Leung
Pages 29-44

4- Shear modulus and material damping of municipal solid waste based on large-scale cyclic triaxial testing
Dimitrios Zekkos, Jonathan D. Bray, and Michael F. Riemer
Pages 45-58

5- Calibration of models for pile settlement analysis using 64 field load tests
L. M. Zhang, Y. Xu, and W. H. Tang
Pages 59-73

6- Shear banding and cross-anisotropic behavior observed in laboratory sand tests with stress rotation
Poul V. Lade, Jungman Nam, and Won Pyo Hong
Pages 74-84

7- Field performance, centrifuge testing, and numerical modelling of an induced trench installation
Rodney P. McAffee and Arun J. Valsangkar
Pages 85-101

8- Laboratory characterization of the spatial variability in soils by the EM-wave-based technique
Yu-Hsing Wang and Xiaobo Dong
Pages 102-116

9- Seismic active earth pressure behind a nonvertical retaining wall using pseudo-dynamic analysis
Priyanka Ghosh
10- Driven high capacity H-piles in Hong Kong saprolites: A reliability evaluation of two methods
S. R. Lo, K. S. Li, and J. Lam
Pages 124-130

11- Tunneling effects on jointed pipelines
Assaf Klar, Alec M. Marshall, Kenichi Soga, and Robert J. Mair
Pages 131-139

12- Discussion of “Liquefaction potential of silts from CPTu”
Peter K. Robertson
Pages 140-141

13- Reply to the discussion by Robertson on “Liquefaction potential of silts from CPTu”
Dawn A. Shuttle and John Cunning
Pages 142-145
Computers and Geotechnics

No new issue published.
Flow characteristics of 2-phase granular mass flows from model flume tests
Yasuhiko Okada and Hirotaka Ochiai

Laboratory results from hydro-mechanical tests on a water unsaturated bentonite
Ann Dueck

Physical modeling of desiccation cracking in plastic soils
M.H.T. Rayhani, E.K. Yanful and A. Fakher

Influence of typhoons and earthquakes on rainfall-induced landslides and suspended sediments discharge
Guan-Wei Lin, Hongey Chen, Yi-Hui Chen and Ming-Jame Horng

Unsaturated rock mechanics applied to a low-porosity shale
Mikaël Ramos da Silva, Christian Schroeder and Jean-Claude Verbrugge

Seepage analysis in a fractured rock mass: The upper reservoir of Pushihe pumped-storage power station in China
Ping Li, Wenxi Lu, Yuqiao Long, Zhongping Yang and Jun Li

Site effect microzonation of Qom, Iran
Mohsen Kamalian, Mohammad Kazem Jafari, Mohammad Reza Ghayamghamian, Ali Shafiee, Hossein Hamzehloo, Ebrahim Haghshenas and Abdollah Sohrabi-bidar

Index properties and strength variation controlled by microstructure for sedimentary rocks
N. Sabatakakis, G. Koukis, G. Tsiambaos and S. Papanakli

Discussion on the paper by H. Gullu and E. Ercelebi “A neural network approach for attenuation relationships: An application using strong ground motion data from Turkey (in press)”
H. Sonmez and C. Gokceoglu

Hamza Güllü and Ergun Erçelebi
An evaluation of the osmotic method of controlling suction
P. Delage; Y. J. Cui

An elasto-plastic model for saturated loosely compacted completely decomposed granite
E. C. Y. To; L. G. Tham; Y. D. Zhou

An evaluation of the osmotic method of controlling suction
P. Delage; Y. J. Cui

Evaluation of shallow foundation settlements by an elasto-plastic kinematic-isotropic hardening numerical model for granular soil
G. Abate; C. Caruso; M. R. Massimino; M. Maugeri

A limit analysis of the kinematics of void collapse using the discrete element method
W. L. Lim; G. R. McDowell

Effects of hydraulic shear stress and rate of erosion on the magnitude, degree, and rate of collapse
T. Ayadat; A. Hanna

On the stress distribution at the bonding interface between rock and bolt
Y. -L. Tan; L. -J. Zhang; H. -M. Yang

Determination of volume and centroid of irregular blocks by a simplex integration approach for use in discontinuous numerical methods
A. R. Keneti; A. Jafari
Georisk: Assessment and Management of Risk for Engineered Systems and Geohazards
Vol. 2, No. 1
February, 2008

Modeling and Managing Uncertainties in Rock-Fall Hazards
By Daniel Straub and Matthias Schubert

Application of Logistic Regression Model for Slope Instability Prediction in Cuyahoga River Watershed, Ohio, USA
By A. Nandi and A. Shakoor

A Practical Method for Identifying Parameters in the Seismic Design of Embankments
By Y. Hata, K. Ichii, T. Tsuchida, S. Kano and N. Yamashita

Relevance Vector Machine Applied to Settlement of Shallow Foundations on Cohesionless Soils
By Pijush Samui

Hazard and Risk from Large Landslides from Mount Meager Volcano, British Columbia, Canada
By Pierre Friele, Matthias Jakob, and John Clague
Geosynthetics International

No new issue published
Cost Optimization of Reinforced Earth Walls
P. K. Basudhar, Amol Vashistha, Kousik Deb and Arindam Dey

On the Investigations of Resilient Modulus of Residual Tropical Gravel Lateritic Soils from Senegal (West Africa)
Meissa Fall, Auckpath Sawangsuriya, Craig H. Benson, Tuncer B. Edil and Peter J. Bosscher

The Effect of Spatial Correlation of Cone Tip Resistance on the Bearing Capacity of Shallow Foundations
G. L. Sivakumar Babu and Satyanarayana Murthy Dasaka

Artificial Neural Network Prediction Models for Soil Compaction and Permeability
Sunil K. Sinha and Mian C. Wang

A Consistent Soil Fatigue Framework Based on the Number of Equivalent Cycles
Nii Allotey and M. Hesham El Naggar

Failures Associated with the 2004 Mindulle Typhoon in Taiwan
Jieh-Jiuh Wang, Hoe I. Ling and Andrew Smyth

Nonlinear Analysis of Local Site Effects on Seismic Ground Response in the Bam Earthquake
M. H. T. Rayhani, M. H. El Naggar and S. H. Tabatabaei

Filtration and Clogging Behavior of Geotextiles with Roorkee Soils
Bal Krishna Maheshwari and Deepak A. Gunjadi
Geotechnique
No new issue published
Validation of a numerical modelling technique for multilayered geosynthetic landfill lining systems
G.J. Fowmes, N. Dixon and D.R.V. Jones

Analytical modelling of gas leakage rate through a geosynthetic clay liner–geomembrane composite liner due to a circular defect in the geomembrane
Abdelmalek Bouazza, Thaveesak Vangpaisal, Hossam Abuel-Naga and Jayantha Kodikara

Long-term shear strength of geosynthetic clay liners
Werner Müller, Ines Jakob, Stefan Seeger and Renate Tatzky-Gerth

Laboratory tests of small-diameter HDPE pipes buried in reinforced sand under repeated-load
S.N. Moghaddas Tafreshi and O. Khalaj

An experimental investigation of soil arching within basal reinforced and unreinforced piled embankments
Chen Yun-min, Cao Wei-ping and Chen Ren-peng

Monitoring Field Soil Suction Using a Miniature Tensiometer
Cui Y, Tang A, Mantho AT, De Laure E

Technical Notes
Behavior of EPS geofoam in true triaxial compression tests
Chin Jian Leo, M Kumruzzaman, Henry Wong and Jin H Yin

Numerical simulation of fiber-reinforced sand behavior
G.L. Sivakumar Babu, A.K. Vasudevan and Sumanta Haldar

Laboratory study of expanded polystyrene (EPS) geofoam used with expansive soils
S. Banu Ikizler, Mustafa Aytekin and Evin Nas

Numerical modelling of advective flow through composite liners in case of two interacting adjacent square defects in the geomembranes
Fethi Saidi, Nathalie Touze-Foltz and Patrick Goblet
Widening dissemination in ground improvement
Skinner

Predicting compaction of cohesionless soils using ANN
Abdel-Rahman

Analysis of soil reinforcement interaction in reinforced soil beds
Raghavendra

Bearing capacity of square footing on reinforced pond ash
Bera, Ghosh, Ghosh

Efficacy of lime-stabilised fly ash in expansive soils
Rao, Rao, Babu

Analysis and comparison of displacement granular pile anchors
Madhav, Vidyaranya, Kumar

Testing coir geotextile drains for soft ground improvement
Beena, Babu
International Journal of Geomechanics

No new issue published.
International Journal of Numerical and Analytical Methods in Geomechanics

No new issue published.
Reliability Assessment of Basal-Heave Stability for Braced Excavations in Clay
A. T. C. Goh, F. H. Kulhawy, and K. S. Wong

Uplift Mechanisms of Pipes Buried in Sand
C. Y. Cheuk

Postshaking Shear Strain Localization in a Centrifuge Model of a Saturated Sand Slope
Erik J. Malvick, Bruce L. Kutter, and Ross W. Boulanger

Probability of Exceedance Estimates for Scour Depth around Bridge Piers
Laura C. Bolduc, Paolo Gardoni, and Jean-Louis Briaud

Simplified Plane-Strain Modeling of Stone-Column Reinforced Ground
S. A. Tan, S. Tjahyono, and K. K. Oo

Mechanistic Model for One-Dimensional Consolidation Behavior of Nonsegregating Oil Sands Tailings
R. C. K. Wong, B. N. Mills, and Y. B. Liu

Durability of Cement Stabilized Low Plasticity Soils
Zhongjie Zhang and Mingjiang Tao

Numerical Modeling of Contaminant Transport through Soils: Case Study
A. A. Javadi, M. M. Al-Najjar, and B. Evans

Water Drainage in Double-Porosity Soils: Experiments and Micro–Macro Modeling
Jolanta Lewandowska, Tien Dung Tran Ngoc, Michel Vauclin, and Henri Bertin

Determination of the Critical Slip Surface Using Artificial Fish Swarms Algorithm
Y. M. Cheng, L. Liang, S. C. Chi, and W. B. Wei

Search for Critical Slip Surface in Slope Stability Analysis by Spline-Based GA Method
Jianping Sun, Jiachun Li, and Qingquan Liu

Reinforced Concrete Walls with Vulnerable Foundations
J. Paul Smith-Pardo

Discussion of “Mapping Liquefaction Potential Considering Spatial Correlations of CPT Measurements” by Chia-Nan Liu and Chien-Hsun Chen
Laurie G. Baise, Jennifer A. Lenz, and Eric M. Thompson
Closure by Chia-Nan Liu and Chien-Hsun Chen
Finite Element Analysis of Enlarged End Piles Using Frictional Contact  
D. Sheng, Haruyuki Yamamoto and P. Wriggers

Seepage and Inertia Effect on Rate-dependent Reaction of a Pile in Liquefied Soil  
Ryosuke Uzuoka, Noriaki Sento and Motoki Kazama

Strength and Deformation Characteristics of Scoria in Triaxial Compression at Low Confining Stress  
Y. Agustian and Satoshi Goto

Various Viscosity Types of Geomaterials in Shear and Their Mathematical Expression  
Fumio Tatsuoka, H. Di Benedetto, Tadao Enomoto, Shohei Kawabe and W. Kongkitkul

Small-strain Stress-strain Properties of Expanded Polystyrene Geofoam  
G.E. Abdelrahman, Shohei Kawabe, Yoshimichi Tsukamoto and Fumio Tatsuoka

A Study on the Engineering Properties of Sand Improved by the Sand Compaction Pile Method  
Munenori Hatanaka, L. Feng, Naoki Matsumura and Hiroki Yasu

Liquefaction of Unsaturated Sand considering the Pore Air Pressure and Volume Compressibility of the Soil Particle Skelton  
Toshiyasu Unno, Motoki Kazama, Ryosuke Uzuoka and Noriaki Sento

Effects of Clay Content on Liquefaction Characteristics of Gap-graded Clayey Sands  
W.-J. Chang and M.-L. Hong

An Approach for Assessment of Compaction Curves of Fine-grained Soils at Various Energies using a One Point Test  
S. Horpibulsuk, W. Katkan and A. Apichatvullop

Stress Induced and Inherent Anisotropy on Elastic Stiffness of Soft Clays  
S. Teachavorasinskun and P. Lukkanaprasit

Upper Bound Plasticity Analysis of a Partially-embedded Pipe under Combined Vertical and Horizontal Loading  
C.Y. Cheuk, D.J. White and H.R.C. Dingle
Soil Dynamics and Earthquake Engineering

No new issue published.
