ASTM GEOTECHNICAL TESTING JOURNAL

No new issue published.
Experimental observations on the response of loose sand under simultaneous increase in stress ratio and rotation of principal stresses
Dharma Wijewickreme and Yoginder P. Vaid

A theoretical solution for pile-supported embankments on soft soils under one-dimensional compression
R. P. Chen, Y. M. Chen, J. Han, and Z. Z. Xu

Significance and evaluation of Poisson's ratio in Rayleigh wave testing
Mourad Karray and Guy Lefebvre

Mechanisms of pipe embedment and lateral breakout on soft clay
H. R.C. Dingle, D. J. White, and C. Gaudin

Limit equilibrium slope stability analysis using rigid finite elements
Dieter Stolle and Peijun Guo

Stability of tailings dams under static and seismic loading
Prodromos N. Psarropoulos and Yiannis Tsompanakis

Laterally loaded rigid piles in cohesionless soil
Wei Dong Guo

Vertical uplift capacity of horizontal anchors using upper bound limit analysis and finite elements
Jyant Kumar and K. M. Kouzer

Consistent preload calculations for jackup spudcan penetration in clays
E. T.R. Dean

Geotechnical properties of a municipal water treatment sludge incorporating a coagulant
Brendan C. O’Kelly

Capillary-induced tensile strength in unsaturated sands
Tae-Hyung Kim and Stein Sture

Discussion of “Compressibility behaviour of clays at large pressures”
Eulalio Juárez-Badillo

Reply to the discussion by Juárez-Badillo on “Compressibility behaviour of clays at
large pressures”
Snehasis Tripathy and Tom Schanz

Discussion of “Large-scale modelling of soil–pipe interaction during large amplitude cyclic movements of partially embedded pipelines”
W. O. McCarron

Reply to the discussion by McCarron on “Large-scale modelling of soil–pipe interaction during large amplitude cyclic movements of partially embedded pipelines”
C. Y. Cheuk, D. J. White, and M. D. Bolton
COMPUTERS AND GEOTECHNICS

No new issue published.
High lateral strain ratio in jointed rock masses
Mahendra Singh, Bhawani Singh

Assessment of disaster resilience capacity of hillslope communities with high risk for geological hazards
Su-Chin Chen, Jhy-Wei Ferng, Yu-Ting Wang, Ting-Yeh Wu, Jieh-Jiuh Wang

The knowledge rules of debris flow event: A case study for investigation Chen Yu
Lan River, Taiwan
S. Wan, T.C. Lei, P.C. Huang, T.Y. Chou

A Study of the hydrogeological environment of the lishan landslide area using resistivity image profiling and borehole data
Cheng-Chao Lee, Chieh-Hou Yang, Hsing-Chang Liu, Kuo-Liang Wen, Zi-Bin Wang, Yi-Jie Chen

Dynamic response and pore pressure model of the saturated soft clay around the tunnel under vibration loading of Shanghai subway
Yi-Qun Tang, Zhen-Dong Cui, Xi Zhang, Shu-Kai Zhao

Dynamic compaction properties of bentonite-based materials
Hiroshi Ito, Hideo Komine

Ground motion phenomena in Caltanissetta (Italy) investigated by InSAR and geological data integration
P. Vallone, M.S. Giammarinaro, M. Crosetto, M. Agudo, E. Biescas

Integrated geophysical and geomorphological approach to investigate the snowmelt-triggered landslide of Bosco Piccolo village ( Basilicata, southern Italy)
V. Naudet, M. Lazzari, A. Perrone, A. Loperte, S. Piscitelli, V. Lapenna
Interpretations on how the macroscopic mechanical behavior of sandstone affected by microscopic properties—Revealed by bonded-particle model  
Yo-Ming Hsieh, Hung-Hui Li, Tsan-Hwei Huang, Fu-Shu Jeng

Tracking landslide displacements by multi-temporal DTMs: A combined aerial stereophotogrammetric and LIDAR approach in western Belgium  
O. Dewitte, J.-C. Jasselette, Y. Cornet, M. Van Den Eeckhaut, A. Collignon, J. Poesen, A. Demoulin

Evaluation of the reserve of a granite deposit by fuzzy kriging  
J. Taboada, T. Rivas, A. Saavedra, C. Ordóñez, F. Bastante, E. Giráldez

Normalized undrained shear strength of clay shales  
Marte Gutierrez, Runar Nygård, Kaare Høeg, Toralv Berre

Sediment–landform assemblages and digital elevation data: Testing an improved methodology for the assessment of sand and gravel aggregate resources in north-western Britain  
R.C. Chiverrell, G.S.P. Thomas, G.C. Foster

Predicting intact rock strength for mechanical excavation using multivariate statistics, artificial neural networks, and regression trees  
Bulent Tiryaki

3D geo-mapping based on surface data for preliminary study of underground works: A case study in Val Topina (Central Italy)  
Andrea Tonini, Enrico Guastaldi, Giovanni Massa, Paolo Conti

Review papers: Geomorphological features and 3D modelling of Montelparo mass movement (Central Italy)  
D. Aringoli, M. Calista, B. Gentili, G. Pambianchi, N. Sciarra

Review papers: Engineering properties of loess in Algeria  
M.S. Nouaouria, M. Guenfoud, B. Lafifi
Undrained behaviour of Changi sand in triaxial and plane-strain compression
D. Wanatowski; J. Chu

Thermal regime simulation of embankment and berm in permafrost
Z. R. Yue

Stability of eccentrically loaded footings on slopes
M. Jao; F. Ahmed; G. Muninarayana; M. C. Wang

Predicted ultimate capacity of laterally loaded piles in clay using support vector machine
Pijush Samui

Heating effect on swelling behaviour of expansive soils
M. C. Wang; M. Jao; M. S. Ghazal

Buckling and bending response of slender piles in liquefiable soils during earthquakes
Sumanta Haldar; G.L. Sivakumar Babu; Subhamoy Bhattacharya

Effect of shape on holding capacity of plate anchors buried in soft soil
S. P. Singh; S. V. Ramaswamy
Extreme Rainfall Characteristics for Surface Slope Stability in the Malaysian Penninsular
By Nurly Gofar and Lee Min Lee

Probabilistic Analysis of Load-Settlement Response from Pile Load Tests
By Sumanta Haldar and G.L. Sivakumar Babu

Scenario-Based Earthquake Loss Estimation for the City of Cairo, Egypt
By A.M. Moharram, A.Y. Elghazouli, and J.J. Bommer

Reliability of Passive Earth Pressure
By D.V. Griffiths, Gordon A. Fenton, and Heidi R. Zeimann
GEOSYNTHETICS INTERNATIONAL
Vol. 15, No. 3
June, 2008

Foreword
By Bouazza

The Application of Geotextile and Granular Filters for PCB Remediation
By Kalinovich, Rutter, Rowe, McWatters, and Poland

Dewatering of Oily Slurry using Drying Bed with Geotextile Filter
By Mendonca, Ehrlich, Cammarota, and Freire

Treatment of Lagooned Sewage Sludge in-situ using Electrokinetic Geosynthetics
By Glendinning, Lamont-Black, Jones, and Hall

Performance Modeling and Optimization of Contaminant Extraction using Prefabricated Vertical Wells (PVWs)
By Sharmin, Kunberger, Gabr, Quaranta, and Bowders

Numerical Evaluation of Prefabricated Vertical Drain Enhanced Soil Vapour Extraction System
By Abuel-Naga, Bouazza, Bowders, and Collazos
No new issue this month.
Géotechnique 1948–2008: more than just a journal
S. F. Brown

The founders of Géotechnique
J. B. Burland

Geotechnical publications before Géotechnique
M. Chrimes

Geotechnics: the next 60 years
B. Simpson and F. Tatsuoka

Contributions to Géotechnique 1948–2008: Foundation engineering
R. Salgado, G. T. Houlsby and D. N. Cathie

Contributions to Géotechnique 1948–2008: Retaining structures
G. W. E. Milligan, H. D. St John and T. D. O'Rourke

Contributions to Géotechnique 1948–2008: Slope stability and embankment dams
J. A. Charles and E. N. Bromhead

Contributions to Géotechnique 1948–2008: Tunnelling
J. R. Standing and D. M. Potts

Contributions to Geotechnique 1948–2008: Ground improvement
A. G. Phear and S. J. Harris

Contributions to Geotechnique 1948–2008: Constitutive and numerical modeling
L. Zdravkovic and J. Carter

Contributions to Geotechnique 1948–2008: Physical modelling
D. J. White

Contributions to Geotechnique 1948–2008: Laboratory and field testing
M. Coop and F. Schnaid

Contributions to Geotechnique 1948–2008: Soil behaviour
M. Jefferies, P. Delage and F. Cotecchia

Contributions to Geotechnique 1948–2008: Groundwater
W. Powrie
Contributions to Geotechnique 1948–2008: Soil science and interdisciplinary aspects of geotechnical engineering
K. Soga and S. A. Jefferis

Contributions to Geotechnique 1948–2008: Engineering geology, rock mechanics and rock engineering
J. P. Harrison

Contributions to Geotechnique 1948–2008: Dynamics
R. Lancellotta and J. W. Pappin
A study on biological clogging of nonwoven geotextiles under leachate flow
Ennio M. Palmeira, Aline F.N. Remigio, Maria L.G. Ramos, Ricardo S. Bernardes

Preloading clayey deposit by vacuum pressure with cap-drain: Analyses versus performance
Jinchun Chai, Norihiko Miura, D.T. Bergado

Model studies on geogrid- or geocell-reinforced sand cushion on soft soil
Huabao Zhou, Xuejun Wen

Combined effect of PVDs and reinforcement on embankments over rate-sensitive soils
R. Kerry Rowe, C. Taechakumthorn

The influence of uniaxial tensile strain on the pore size and filtration characteristics of geotextiles
Cho-Sen Wu, Yung-Shan Hong, Ruei-Hung Wang

Evaluating the effects of the magnitude and amplification of pseudo-static acceleration on reinforced soil slopes and walls using the limit equilibrium Horizontal Slices Method
H. Nouri, A. Fakher, C.J.F.P. Jones

Technical Note
Earth reinforcement using soilbags
Yongfu Xu, Jian Huang, Yanjun Du, De’an Sun
GROUND IMPROVEMENT

No new issue published.
Analysis of soil-pile-structure interaction in a two-layer ground during earthquakes considering liquefaction
C. W. Lu, F. Oka, F. Zhang

Finite element analyses of layered viscoelastic system under vertical circular loading
Q. Xu, M. S. Rahman

SANISAND: Simple anisotropic sand plasticity model
Mahdi Taiebat, Yannis F. Dafalias

Continuous velocity fields for the T-bar problem
Assaf Klar, Ashraf S. Osman

A discrete element model for kaolinite aggregate formation during sedimentation
Ning Lu, Matthew T. Anderson, William J. Likos, Graham W. Mustoe

A cap model for partially saturated soils
R. Kohler, G. Hofstetter
Does a representative volume element exist for fatigue life prediction? The case of aggregate composites
Adel Lachihab, Karam Sab

Arbitrary Lagrangian-Eulerian method for large-strain consolidation problems
Majidreza Nazem, Daichao Sheng, John P. Carter, Scott W. Sloan

A non-coaxial constitutive model for sand deformation under rotation of principal stress axes
Ali Lashkari, Manouchehr Latifi

Estimation of effective stress parameter of unsaturated soils by using artificial neural networks
C. Kayadelen

Theoretical and numerical analyses of chemical-dissolution front instability in fluid-saturated porous rocks
Chongbin Zhao, B. E. Hobbs, P. Hornby, A. Ord, Shenglin Peng, Liangming Liu

Comparison between iterative solution of symmetric and non-symmetric forms of Biot's FEM equations using the generalized Jacobi preconditioner
Kim-Chuan Toh, Kok-Kwang Phoon
Seismic Rotational Displacement of Gravity Walls by Pseudodynamic Method
Deepankar Choudhury and Sanjay S. Nimbalkar

Effect of Footing Roughness on Lower Bound $N_\gamma$ Values
Jyant Kumar and Vishwas N. Khatri

Model for Consolidation-Induced Solute Transport with Nonlinear and Nonequilibrium Sorption
Patrick J. Fox and Jangguen Lee

Analytical and Numerical Modeling of Consolidation by Vertical Drain beneath a Circular Embankment
Buddhima Indraratna, Ala Aljorany, and Cholachat Rujikiatkamjorn

Technical Note
Unsaturated Soil Seepage Analysis Using a Rational Transformation Method with Under-Relaxation
Y.-G. Cheng, K.-K. Phoon, and T.-S. Tan
TECHNICAL PAPERS

Transient Head Development due to Flood Induced Seepage under Levees
Senda Ozkan, Donald D. Adrian, George L. Sills, and Vijay P. Singh

Empirical Predictive Models for Earthquake-Induced Sliding Displacements of Slopes
Gokhan Saygili and Ellen M. Rathje

Probabilistic Seismic Hazard Analysis for the Sliding Displacement of Slopes: Scalar and Vector Approaches
Ellen M. Rathje and Gokhan Saygili

Liquefaction Potential Map of Charleston, South Carolina Based on the 1886 Earthquake
Hossein Hayati and Ronald D. Andrus

Effects of Adsorbed Water Layer in Predicting Saturated Hydraulic Conductivity for Clays with Kozeny–Carman Equation
Purnendu N. Singh and Wesley W. Wallender

Predicting the Erosion Rate of Chemically Treated Soil Using a Process Simulation Apparatus for Internal Crack Erosion
Buddhima Indraratna, Thevaragavan Muttuvel, Hadi Khabbaz, and Robert Armstrong

Deep Mixing Induced Property Changes in Surrounding Sensitive Marine Clays
Shui-Long Shen, Jie Han, and Yan-Jun Du

Measuring Soil Pressure on a Buried Model Structure for the Validation of Quantitative Frameworks
Mark Talesnck, Hanna Horany, Avraham N. Dancygier, and Yuri S. Karinski

Numerical Simulation of Vertical Pullout of Plate Anchors in Clay
Zhenhe Song, Yuxia Hu, and Mark F. Randolph

TECHNICAL NOTES

Improved Approach to Construct Constitutive Surfaces for Stable-Structured Soils Covering Both Saturated and Unsaturated Conditions
Xiong Zhang and Jean-Louis Briaud
Further Advancement in Filtration Criteria through Constriction-Based Techniques
Ashok K. Raut and Buddhima Indraratna

Analytical Construction of Transient Flow Nets in Homogeneous and Isotropic Flow Medium
Senda Ozkan and Donald D. Adrian

OCR Prediction Using Support Vector Machine Based on Piezocone Data
Pijush Samui, T. G. Sitharam, and Pradeep U. Kurup
No new issue this month.
No new issue this month.
