ACTA GEOTECHNICA

No Issue Published
ASTM GEOTECHNICAL TESTING JOURNAL

No new issue published.
Freezing-induced water migration in compacted base-course materials
J.-M. Konrad

Shear strength characteristics of statically compacted unsaturated kaolin
Won Taek Oh, Vinod K. Garga, and Sai K. Vanapalli

A practical iterative procedure to estimate seismic-induced deformations of shallow rectangular structures
Antonio Bobet, Gabriel Fernandez, Hongbin Huo, and Julio Ramirez

Specimen nonuniformities in water-pluviated and moist-tamped sands under undrained triaxial compression and extension
P. R. Thomson and R. C.K. Wong

Analysis of instrumented sharp cone and pressuremeter tests in stiff sensitive clay
V. Silvestri and G. Abou-Samra

Modulus–suction–moisture relationship for compacted soils
Auckpath Sawangsuriya, Tuncer B. Edil, and Peter J. Bosscher

Geotechnical characteristics of large slow, very slow, and extremely slow landslides
James Glastonbury and Robin Fell

Experimental study of interaction and coupling effects in pile groups subjected to torsion
L. G. Kong and L. M. Zhang

Effect of cementation on the compressibility of Singapore upper marine clay
Han-Eng Low and Kok-Kwang Phoon

Sonic echo and impulse response tests for length evaluation of soil nails in various bonding mediums
Shu-Tao Liao, Chin-Kuo Huang, and Chung-Yue Wang

Influence of tension cut-off on the stability of anchored concrete soldier-pile walls in clay
Armando N. Antão, Nuno M. da Costa Guerra, Manuel Matos Fernandes, and António S. Cardoso
Clogging of unsaturated gravel permeated with landfill leachate
Reagan McIsaac and R. Kerry Rowe

A modified approach for determination of nonlinear properties in seismic response analyses for 200 m high core rock-fill dams
Hongjun Li, Shichun Chi, Gao Lin, and Hong Zhong

Long-term performance of a wide embankment on soft clay improved with prefabricated vertical drains
S. R. Lo, J. Mak, C. T. Gnanendran, R. Zhang, and G. Manivannan

Limit analysis of the stability of slopes reinforced with piles against landslide in nonhomogeneous and anisotropic soils
T. K. Nian, G. Q. Chen, M. T. Luan, Q. Yang, and D. F. Zheng

Discrete element method (DEM) numerical modeling of double-twisted hexagonal mesh
David Bertrand, François Nicot, Philippe Gotteland, and Stéphane Lambert

Similarity of soil variability in centrifuge models
L. L. Zhang, L. M. Zhang, and W. H. Tang

Cone penetration test (CPT) methods for end-bearing assessment of open- and closed-ended driven piles in siliceous sand
Xiangtao Xu, James A. Schneider, and Barry M. Lehane

Axial testing and numerical modeling of square shaft helical piles under compressive and tensile loading
Ben Livneh and M. Hesham El Naggar

Simplified models of spreading flow of dry granular material
Oldrich Hungr

Hydrostatic compression model for sandy soils
Javier Vallejos

Development of an NEHRP map for the Orleans suburb of Ottawa, Ontario
Dariush Motazedian and James Hunter
Methodology for automated GIS-aided seismic microzonation studies  
Achilleas G. Papadimitriou, Andreas A. Antoniou, George D. Bouckovalas, Pavlos G. Marinos

A finite element solution scheme for an elastic–viscopolastic soil model  
Curtis Kelin, Jitendra Sharma, David Hughes

Effect of soil spatial variability on the response of laterally loaded pile in undrained clay  
Sumanta Haldar, G.L. Sivakumar Babu

Finite element simulation of localization in granular materials by micropolar continuum approach  
Haydar Arslan, Stein Sture

Settlement analysis of piles with rectangular cross sections in multi-layered soils  
D. Basu, M. Prezzi, R. Salgado, T. Chakraborty

Analysis and design of partial ground improvement in deep excavations  
Chang-Yu Ou, Fu-Chen Teng, I-Wen Wang

Numerical study on the optimum layout of soil-nailed slopes  
Chia-Cheng Fan, Jiun-Hung Luo

Time-frequency analyses of pile-integrity testing using wavelet transform  
Sheng-Huo Ni, Kuo-Feng Lo, Lutz Lehmann, Yan-Hong Huang

Mapped infinite p-element for two-dimensional problems of unbounded domains  
A. Houmat

Estimation of horizontal subgrade reaction coefficient by inverse analysis  
N. Kobayashi, T. Shibata, Y. Kikuchi, A. Murakami

Technical Communications:  
Failure analysis of high-concrete gravity dam based on strength reserve factor method  
Zhou Wei, Chang Xiaolin, Zhou Chuangbing, Liu Xinghong

Three-dimensional nonlinear finite element modeling of composite foundation formed by CFG-lime piles  
Jun-Jie Zheng, Sari W. Abusharar, Xian-Zhi Wang
ENGINEERING GEOLOGY

No Issue Published
GEOMECHANICS AND GEOENGINEERING

No new issue published.
GEORISK: ASSESSMENT AND MANAGEMENT OF RISK FOR ENGINEERED SYSTEMS AND GEOHAZARDS

No new issue published.
Aging of Rolled Erosion Control Products for Channel Erosion Control
By Li and Khanna

Analysis of Sand Slopes Stabilized with Facing Soil Bags with Extended Reinforcement Strips
By Huang, Matsushima, Mohri, and Tatsuoka

Reliability Analysis of Reinforced Soil Walls Under Static and Seismic Forces
By Sayed, Dodagoudar, and Rajagopal

Back-Analysis of a PVC Geomembrane-lined Pond Failure
By Stark, Newman, and Aust

Refinement of K-Stiffness Method for Geosynthetic-Reinforced Soil Walls
By Bathurst, Miyata, Nernheim, and Allen

Seepage through Side Slopes of Small Water Impoundments
By Navarro, Candel, Yustres, and Garcia

Influence of Fibers on Swelling Properties of Clayey Soil
By Al-Akhras, Attom, Al-Akhras, and Malkawi
No new issue this month.
The ultimate undrained resistance of partially embedded pipelines
Merifield, White, Randolph

Micro- and macro-mechanical behaviour of DEM crushable materials
Bolton, Nakata, Cheng

Finite element verification of an enhanced limit equilibrium method for slope analysis
Tan, Sarma

Limit analysis with anisotropic fibre-reinforced soil
Michalowski

Hydraulic conductivity to Jet-A1 of GCLs after up to 100 freeze–thaw cycles
Rowe, Mukunoki, Bathurst

Buoyancy of tunnels in soft soils
Verruijt, Strack

Filtration behaviour of granular soils under cyclic load
Kamruzzaman, Haque, Bouazza

Meshfree modelling of one-dimensional contaminant migration
Kumar, Dodagoudar

DISCUSSIONS
Burland

Greenwood

Juárez-Badillo
Pseudo-dynamic approach of seismic design for waterfront reinforced soil-wall
Syed Mohd. Ahmad, Deepankar Choudhury

The behavior of a laminated reinforced granular column
Cho-Sen Wu, Yung-Shan Hong

Effects of viscous behavior of geosynthetic reinforcement and foundation soils on the performance of reinforced embankments
Allen Lunzhu Li, R. Kerry Rowe

Seismic response of reinforced soil retaining wall models: Influence of backfill relative density
G. Madhavi Latha, A. Murali Krishna

Technical note
New seismic parameters in the analysis of retaining walls with reinforced backfill capability
S. Shekarian, A. Ghanbari, A. Farhadi

On the interface shear resistance of a novel geogrid with in-plane drainage capability
Brendan C. O’Kelly, Patrick J. Naughton

Investigation on failure of a geosynthetic lined reservoir
W. Wu, X.T. Wang, F. Aschauer
Predicted and measured loads using the coherent gravity method
Bathurst, Nernheim, Allen

Response of granular pile-anchors under compression
Rao, Phanikumar, Suresh

Electrochemical stabilisation for offshore model caissons
Mohamedelhassan, Shang, Ismail, Randolph

Modelling and acoustic monitoring of grout propagation in sands
Saiyouri, Jason, Chupin, Hicher

Seismic response evaluation of sites improved by deep mixing, Part I: Proposed approach
Siddharthan, Porbaha

Seismic response evaluation of sites improved by deep mixing, Part 2: Verification
Siddharthan, Porbaha
Flow-stress coupled permeability tensor for fractured rock masses
Chuang B. Zhou, Radhey S. Sharma, Yi F. Chen, Guan Rong

Coupled simulation of wave propagation and water flow in soil induced by high-speed trains
P. Kettil, B. Lenhof, K. Runesson, N.-E. Wiberg

Numerical analysis of block stone displacements in ancient masonry structures: A new method to estimate historic ground motions
Ronnie Kamai, Yossef H. Hatzor

Evaluating the stress intensity factors of anisotropic bimaterials using boundary element method
Chao-Shi Chen, Chien-Chung Ke, Chia-Huei Tu

A model of capillary cohesion for numerical simulations of 3D polydisperse granular media
V. Richefeu, M. S. El Youssoufi, R. Peyroux, F. Radjaï

Underestimation of roughness in rough rock joints
Eun-Soo Hong, Jong-Sub Lee, In-Mo Lee

Short Communications
DEM analysis of the crack propagation in brittle clays under uniaxial compression tests
Luis F. Vesga, Luis E. Vallejo, Sebastian Lobo-Guerrero

Ultimate bearing capacity of equally spaced multiple strip footings on cohesionless soils without surcharge
K. M. Kouzer, Jyant Kumar
Numerical modelling of dynamic consolidation on granular soils
S. López-Querol, J. A. Fernández-Merodo, P. Mira, M. Pastor

Numerical estimation of REV and permeability tensor for fractured rock masses by composite element method

Analysis of beams on tensionless reinforced granular fill-soil system
Priti Maheshwari

Constitutive description of interface behavior including cyclic loading and particle breakage within the framework of critical state soil mechanics
Huabei Liu, Hoe I. Ling

Identifying parameters controlling soil delayed behaviour from laboratory and in situ pressuremeter testing
Zhen-Yu Yin, Pierre-Yves Hicher

Lagrangian meshfree particles method (SPH) for large deformation and failure flows of geomaterial using elastic-plastic soil constitutive model
Ha H. Bui, Ryoichi Fukagawa, Kazunari Sako, Shintaro Ohno
Modeling of Pipe–Soil Interaction and Its Application in Numerical Simulation
Yinghui Tian and Mark J. Cassidy

Simple Formulas for the Response of Shallow Foundations on Compressible Sands
Nobutaka Yamamoto, Mark F. Randolph, and Itai Einav

Optimum Design of Cantilever Retaining Walls Using Target Reliability Approach
G. L. Sivakumar Babu and B. Munwar Basha

Observations on Return Mapping Algorithms for Piecewise Linear Yield Criteria
Jinsong Huang and D. V. Griffiths

Technical Note

Implicit Algorithm for Modeling Unsaturated Soil Response in Three-Invariant Stress Space
Laureano R. Hoyos and Pedro Arduino
TECHNICAL PAPERS

Analyzing Liquefaction-Induced Lateral Spreads Using Strength Ratios
Scott M. Olson and Cora I. Johnson

Simplified Procedure for Developing Joint Distribution of $a_{\text{max}}$ and $M_w$ for Probabilistic Liquefaction Hazard Analysis
C. Hsein Juang, David Kun Li, Sunny Ye Fang, Zhuzhao Liu, and Eng Hui Khor

Liquefaction and Deformation Analyses Using a Total Stress Approach
Michael H. Beaty and Peter M. Byrne

Volumetric Strains of Clean Sands Subject to Cyclic Loads
Pendo M. Duku, Jonathan P. Stewart, Daniel H. Whang, and Eric Yee

Dynamic Centrifuge Testing of Slickensided Shear Surfaces
Christopher L. Meehan, Ross W. Boulanger, and J. Michael Duncan

Economic Design Optimization of Foundations
Yu Wang and Fred H. Kulhawy

Load Resistance Factor Design of Axially Loaded Pile Based on Load Test Results
Sumanta Haldar and G. L. Sivakumar Babu

Analysis and Performance of Piled Rafts Designed Using Innovative Criteria
Luca de Sanctis and Gianpiero Russo

Capacity, Settlement, and Energy Dissipation of Shallow Footings Subjected to Rocking
Sivapalan Gajan and Bruce L. Kutter

Effect of Penetration Rate on Cone Penetration Resistance in Saturated Clayey Soils
Kwangkyun Kim, Monica Prezzi, Rodrigo Salgado, and Woojin Lee

Fast Stacking and Phase Corrections of Shear Wave Signals in a Noisy Environment
Scott J. Brandenberg, Bruce L. Kutter, and Daniel W. Wilson

Sepiolite as an Alternative Liner Material in Municipal Solid Waste Landfills
Yucel Guney, Savas Koparal, and Ahmet H. Aydilek

Deeply Buried Thermoplastic Pipe Field Performance over Five Years
Shad Sargand, Teruhisa Masada, Bashar Tarawneh, and Doug Gruver
Three-Dimensional Stability Analysis of Convex Slopes in Plan View
Orang Farzaneh, Faradjollah Askari, and Navid Ganjian

TECHNICAL NOTES

Forensic Investigation of Pavement Premature Failure due to Soil Sulfate-Induced Heave
Zhiming Si

Identifying Consolidation Coefficient: Linear Excess Pore-Water Pressure
Sushil K. Singh

Consolidation of a Double-Layered Compressible Foundation Partially Penetrated by Deep Mixed Columns
Linchang Miao, Xinhui Wang, and Edward Kavazanjian, Jr.

Strength Properties of Hexametaphosphate Treated Soils
Amin Falamaki, Nader Shariatmadari, and Ali Noorzad

DISCUSSIONS AND CLOSURES

Discussion of “Bearing Capacity of Piled Rafts on Soft Clay Soils” by Luca de Sanctis and Alessandro Mandolini
Rongchang Yang and Adel M. Hanna

Closure to “Bearing Capacity of Piled Rafts on Soft Clay Soils” by Luca de Sanctis and Alessandro Mandolini
Luca de Sanctis and Alessandro Mandolini

Discussion of “Numerical Investigation of the Effect of Vertical Load on the Lateral Response of Piles” by S. Karthigeyan, V. V. G. S. T. Ramakrishna, and K. Rajagopal
Eulalio Juárez-Badillo

Closure to “Numerical Investigation of the Effect of Vertical Load on the Lateral Response of Piles” by S. Karthigeyan, V. V. G. S. T. Ramakrishna and K. Rajagopal
S. Karthigeyan, V. V. G. S. T. Ramakrishna, and K. Rajagopal

Discussion of “Construction of Concrete-Faced Rockfill Dams with Weak Rocks” by Hao-Feng Xing, Xiao-Nan Gong, Xiao-Guang Zhou, and Hai-Feng Fu
Hasan Tosun
Dynamic parameters of structures extracted from ambient vibration measurements: An aid for the seismic vulnerability assessment of existing buildings in moderate seismic hazard regions
Clotaire Michel, Philippe Guéguen, Pierre-Yves Bard

Dynamic properties and liquefaction resistance of two soil materials in an earthfill dam—Laboratory test results
V.C. Xenaki, G.A. Athanasopoulos

Response of pendulums to complex input ground motion
Vladimir Graizer, Erol Kalkan

Seismic site effects by an optimized 2D BE/FE method I. Theory, numerical optimization and application to topographical irregularities
B. Gatmiri, C. Arson, K.V. Nguyen

Seismic site effects by an optimized 2D BE/FE method II. Quantification of site effects in two-dimensional sedimentary valleys
B. Gatmiri, C. Arson

Effect of unsupported sleepers on wheel/rail normal load
Shuguang Zhang, Xinbiao Xiao, Zefeng Wen, Xuesong Jin
Early history of the response spectrum method
Mihailo D. Trifunac

The effect of discontinuity frequency on ground vibrations produced from bench blasting: A case study
Hakan Ak, Adnan Konuk

Effects of time series analysis protocols on transfer functions calculated from earthquake accelerograms
A. Mikami, J.P. Stewart, M. Kamiyama

Surface-to-base amplification evaluated from KiK-net vertical array strong motion records
Takaji Kokusho, Katsuharu Sato

Neuro-fuzzy control strategy for earthquake-excited nonlinear magnetorheological structures
Zhao-Dong Xu, Ying-Qing Guo

Seismic passive resistance with vertical seepage and surcharge
Jun-Jie Wang, Hui-Ping Zhang, He-Jun Chai, Jun-Gao Zhu

Evaluation of near-source seismic records based on damage potential parameters: Case study: Greece
Constantine C. Spyarakos, Charilaos A. Maniatakis, John Taflambas

Seismo-engineering parameters for sites of interim storages for spent nuclear fuel at German nuclear power plants
Günter Leydecker, Timo Schmitt, Holger Busche, Thomas Schaefer
