Analytical active earth thrust on cantilever walls with short heel
Venanzio R. Greco

Comparison of two fine sands under torsional loading
V. N. Georgiannou and A. Tsomokos

Effect of footing width on $N_γ$
Jyant Kumar and V. N. Khatri

Performance of soil nails in Dublin glacial till
Christopher O. Menkiti and Michael Long

Reliability measures for pile foundations based on cone penetration test data
Sumanta Haldar and G. L. Sivakumar Babu

The tensile capacity of bored piles in frictional soils
Sven Krabbenhoft, Allan Andersen, and Lars Damkilde

On site characterization and air content evaluation of coastal soils by image analysis to estimate liquefaction risk
P. Breul, Y. Haddani, and R. Gourvès

Buried high-density polyethylene pipelines subjected to normal and strike-slip faulting — a centrifuge investigation
Da Ha, Tarek H. Abdoun, Michael J. O’Rourke, Michael D. Symans, Thomas D. O’Rourke, Michael C. Palmer, and Harry E. Stewart

Case study on seismic tunnel response
Stavroula Kontoe, Lidija Zdravkovic, David M. Potts, and Christopher O. Menkiti

Modelling the combined effect of strain rate and temperature on one-dimensional compression of soils
L. Laloui, S. Leroueil, and S. Chalindar

Relationships between size and velocity for particles within debris flows
Adam B. Prochaska, Paul M. Santi, and Jerry D. Higgins

Discussion of “A new modelling approach for unsaturated soils using independent stress variables”
Xiong Zhang and Robert L. Lytton
Reply to the discussion by Zhang and Lytton on “A new modelling approach for unsaturated soils using independent stress variables”
Daichao Sheng, Delwyn G. Fredlund, and Antonio Gens

Discussion of “Seismic active earth pressure behind a nonvertical retaining wall using pseudo-dynamic analysis”
Venanzio R. Greco

Reply to the discussion by Greco on “Seismic active earth pressure behind a nonvertical retaining wall using pseudo-dynamic analysis”
Priyanka Ghosh

Geo-Strata, Featured Articles
Volume 11, Issue 8
November/December 2008

Foundation Design Approach of Past, Present and Future
Fellenius, B.

Evaluating Deep Foundations by In-Situ Tests
Mayne, P.

Recent Advances in Foundation Equipment
Justason and Macnab

Preserving a Historic Structure at the World Trade Center Site
Sandiford and Lizzo
Local measurements of the polar deformation response in a hollow cylinder apparatus
Brendan C. O'Kelly; Patrick J. Naughton

Stabilisation of a progressive railway embankment slip
Brendan C. O'Kelly; Phillip N. Ward; Matthew J. Raybould

Centrifuge modelling of inclined micro-piles for liquefaction remediation of existing buildings
Helen Mitrani; S. P. G. Madabhushi

Discrete element modelling of railway ballast under triaxial conditions
Mingfei Lu; Glenn R. McDowell

Performance of square footing with structural skirt resting on sand
Mohammed Yousuf Al-Aghbari; R. K. Dutta

A critical review on granular dam filter behaviour - from particle sizes to constriction-based design criteria
Buddhima Indraratna; Laricar Dominic O. Trani; Hadi Khabbaz
Georisk: Assessment and Management of Risk for Engineered Systems and Geohazards
Volume 2, Issue 4
December, 2008

Editorial
By Thomas Glade, Farrokh Nadim, Hans Stoetter, and Fausto Guzzetti

Forecasting Medium-Range Hazard on European Scale
By J. Bartholmes, J. Thielen, and M. Kalas

Measuring the Sustainability of Tsunami Early Warning Systems: An Interdisciplinary Research Agenda
By J.A. Lassa

MONITOR: Hazard Monitoring for Risk Assessment and Risk Communication

Stochastic Design of an Early Warning System
By Zenon Medina-Cetina and Farrokh Nadim

A Flood Warning System for Railways
By Thomas Nester, Adreas Schobel, Ulrike Drabek, Christian Rachoy, and Hans Wiesenegger

Natural Hazards as Pre-Conditions of Technological Disasters in Russia
By E. Petrova

Geostatistics for Automatic Estimation of Environmental Variable-Some Simple Solutions
By J.O. Skoien, E.J. Pebesma, and G. Bloschl
Geosynthetics International
December, 2008

No New Issue Published
Influence of Water Pressure on the Stress State in Stopes with Cohesionless Backfill
Li Li and Michel Aubertin

A Methodology for Simulating Radionuclide Diffusion in Unsaturated Soils
R. R. Rakesh, D. N. Singh and R. N. Nair

Statistical Analysis of Landslide Events in Central America and their Run-out Distance
Graziella Devoli, Fabio V. De Blasio, Anders Elverhøi and Kaare Høeg

Permeability of Municipal Solid Waste in Bioreactor Landfill with Degradation
M. S. Hossain, K. K. Penmethsa and L. Hoyos

The Dimensioning of Dowels for the Stabilization of Potentially Unstable Rock Blocks on the Walls of Underground Chambers
P. P. Oreste

Evaluation of Plasticity Models’ Ability to Analyze Typical Earth Dams’ Soil Materials
C. J. Loupasakis, B. G. Christaras, G. Ch. Dimopoulos and T. N. Hatzigogos

Active Soils of the Niger Delta in Road Pavement Design and Construction
Olujide Omotosho and Amadise Save Ogboin

Cyclic Swell–Shrink Behaviour of a Compacted Expansive Soil
Snehasis Tripathy and Kanakapura S. Subba Rao

Utilization of Lime for Stabilizing Soft Clay Soil of High Organic Content
Mohamed A. Sakr, Mohamed A. Shahin and Yasser M. Metwally

Assessment of Some Hydraulic Properties of Slime Slurries from Sand Mining Pits Using a Modified Triaxial Cell
Abdelmalek Bouazza, Asadul Haque and Dong Mei Wang

Statistical Assessment of Unidirectional Propagation of a Leachate Contamination Plume
M. Pacheco, N. Sivakugan and M. C. Barbosa

Free-Swell and Swelling Pressure of Unsaturated Compacted Clays; Experiments and Neural Networks Modeling
Iman Ashayeri and Shahabodin Yasrebi
Studies on Construction Pre-control of a Connection Aisle Between Two Neighbouring Tunnels in Shanghai by Means of 3D FEM, Neural Networks and Fuzzy Logic
You-Liang Chen, Rafig Azzam, Tomas M. Fernandez-Steeger and Lei Li

Statistical Distributions of Hydraulic Conductivity from Reliability Analysis Data
C. M. O. Nwaiwu

Time-Dependent Behaviour and Static Liquefaction Phenomenon of Sand
Erdin Ibraim, Herve Di Benedetto and Thiep Doanh
Geotechnique

Effects of geosynthetics on reduction of reflection cracking in asphalt overlays
Ali Khodaii, Shahab Fallah, Fereidoon Moghadas Nejad

Equivalent seismic coefficient in geocell retention systems
Dov Leshchinsky, Hoe I. Ling, Jui-Pin Wang, Arik Rosen, Yoshiyuki Mohri

Large scale direct shear tests of soil/PET-yarn geogrid interfaces
Chia-Nan Liu, Yu-Hsien Ho, Jian-Wen Huang

The stress–strain behaviour of multiple cell geocell packs
J. Wesseloo, A.T. Visser, E. Rust

A simplified method for analysis of a piled embankment reinforced with geosynthetics
Sari W. Abusharar, Jun-Jie Zheng, Bao-Guo Chen, Jian-Hua Yin

Geomembrane tensions and strains resulting from differential settlement around rigid circular structures
B. Zhu, D. Gao, Y.M. Chen

Analytical modeling of geogrid reinforced soil foundation
Radhey Sharma, Qiming Chen, Murad Abu-Farsakh, Sungmin Yoon

Technical note

Swelling behaviour of a geofiber-reinforced expansive soil
B.V.S. Viswanadham, B.R. Phanikumar, Rahul V. Mukherjee
Ground Improvement

No Issue Published
International Journal of Analytical and Numerical Methods in Geomechanics

No Issue Published
Technical Papers

Resistance Factors for Use in Load and Resistance Factor Design of Driven Pipe Piles in Sands
K. C. Foye, G. Abou-Jaoude, M. Prezzi, and R. Salgado

CPT-Based Method for the Installation of Suction Caissons in Sand
Marc Senders and Mark F. Randolph

$p-y$ Criterion for Rock Mass
Robert Liang, Ke Yang, and Jamal Nusairat

Numerical Study of the Effect of Foundation Size for a Wide Range of Sands
Nobutaka Yamamoto, Mark F. Randolph, and Itai Einav

Zero-Displacement Lateral Spreads, 1999 Kocaeli, Turkey, Earthquake
T. Leslie Youd, Daniel W. DeDen, Jonathan D. Bray, Rodolfo Sancio, K. Onder Cetin, and Travis M. Gerber

Effect of Soil Permeability on Centrifuge Modeling of Pile Response to Lateral Spreading
Lenart González, Tarek Abdoun, and Ricardo Dobry

Seismic Displacement Criterion for Soil Retaining Walls Based on Soil Strength Mobilization
C.-C. Huang, S.-H. Wu, and H.-J. Wu

CPT-Based Probabilistic Soil Characterization and Classification
K. Onder Cetin and Cem Ozan

Effect of Loading Mode on Strain Softening and Instability Behavior of Sand in Plane-Strain Tests
J. Chu and D. Wanatowski

Coupled Thermohydromechanical Modeling of the Full-Scale In Situ Test “Prototype Repository”
G. J. Chen and A. Ledesma

Structural Assessment of a Concrete Dam Based on Uplift Pressure Monitoring
C. Bernstone, M. Westberg, and J. Jeppsson
Quantification of Cable Deformation with Time Domain Reflectometry—Implications to Landslide Monitoring
Chih-Ping Lin, Shr-Hong Tang, Wen-Chin Lin, and Chih-Chung Chung

Fall Cone Test to Characterize Shear Strength of Organic Sediments
R. Zentar, N.-E. Abriak, and V. Dubois

Technical Notes

Dual-Weight Fall Cone Method for Simultaneous Liquid and Plastic Limit Determination
Landris T. Lee, Jr. and Reed B. Freeman

Discussions and Closures

Discussion of “San Jacinto Monument Case History” by Jean-Louis Briaud, Jennifer Nicks, Keunyoung Rhee, and Gregory Stieben
Bengt H. Fellenius and Mauricio Ochoa
Soil Dynamics and Earthquake Engineering

No New Issue Published.
Mobilisation of Earth Pressure Acting on Pile Caps under Cyclic Loading
Akihiro Takahashi, Hideki Sugita and Shunsuke Tanimoto

CPTU Simplified Stress-based Model for Evaluating Soil Liquefaction Potential
C. H. Juang, C.-H. Chen and P. W. Mayne

Soil-water Coupled Finite Deformation Analysis Based on a Rate-type Equation of Motion Incorporating the SYS Cam-clay Model
Toshihiro Noda, Akira Asaoka and Masaki Nakano

Experiments and Predictions of Soil Desaturation by Air-injection Technique and the Implications Mediated by Multiphase Flow Simulation
Hideaki Yasuhara, Mitsu Okamura and Yoshinori Kochi

A Slope Stability Analysis Considering Undrained Strength Anisotropy of Natural Clay Deposits
Takaharu Shogaki and Naohisa Kumagai

Formulation of Gmax from Reconstituted Clayey Soils and Its Application to Gmax Measured in the Field
Takayuki Kawaguchi and Hiroyuki Tanaka

Temperature Effects on Unconfined Compressive Strength and Microstructure of Foamed Mixture Lightweight Soil Containing Flaked Polyethylene Terephthalate (PET)
Takeshi Kamei, Jun-ichi Takashima and Toshihide Shibi

Finite Element Limit Analysis of Passive Earth Resistance in Cohesionless Soils
J. S. Shiau, C. E. Augarde, A. V. Lyamin and S. W. Sloan

Undrained Cyclic Shear Behaviour of Reconstituted Scoria Deposit
Y. Agustian and Satoshi Goto

Design Parameters for EPS Geofoam (discussion)
G. A. Athanasopoulos and V. C. Xenaki

Design Parameters for EPS Geofoam (closure)
D. Negussey
