An Empirical Relationship for Determining Shear Wave Velocity in Granular Materials Accounting for Grain Morphology
Patel A., Bartake P., Singh D.

Evaluation of Shear Wave Velocity Based Soil Liquefaction Resistance Criteria by Centrifuge Tests
Fu L., Liu G., Zeng X.

Estimation of the Apparent Permeability in the Dynamic Centrifuge Tests
Su D., Li X., Xing F.

Membrane Penetration Remedy for the Testing of Lightly Cemented Scrap Rubber Tire Chips
Tsoi W., Lee K.

Shear Load Tests on Stone Columns With and Without Geosynthetic Encasement
Murugesan S., Rajagopal K.

Evaluation of Rock Bolt Integrity using Guided Ultrasonic Waves
Han S., Lee I., Lee Y., Lee J.

An In Situ Test Method for Evaluating the Coupled Pore Pressure Generation and Nonlinear Shear Modulus Behavior of Liquefiable Soils
Cox B., Stokoe K., Rathje E.

Modified Ohio’s Curves: A Rapid Estimation of Compaction Curves for Coarse- and Fine-Grained Soils
Horpibulsuk S., Katkan W., Naramitkornburee A.

Indirect Diametrical Tensile Testing with Internal Displacement Measurement and Stiffness Determination
Gnanendran C., Piratheepan J.

Determination of Shrinkage Limit of Fine-Grained Soils by Wax Method
Prakash K., Sridharan A., Baba J., Thejas H.
A transfer coefficient method for rock slope toppling
C.H. Liu, M.B. Jaksa, and A.G. Meyers

Centrifuge and numerical modeling of axial load effects on piles in consolidating ground
S. Y. Lam, Charles W.W. Ng, C. F. Leung, and S. H. Chan

Radial consolidation with vertical drains and general time-dependent loading
Enrico Conte and Antonello Troncone

Horizontal pressure on barricades for backfilled stopes. Part I: Fully drained conditions
Li Li and Michel Aubertin

Horizontal pressure on barricades for backfilled stopes. Part II: Submerged conditions
Li Li and Michel Aubertin

Modelling the erosion rate of chemically stabilized soil incorporating tensile force – deformation characteristics
Buddhima Indraratna, Thevaragavan Muttuvel, and Hadi Khabbaz

A geophysical and geotechnical study to determine the hydrological regime of the Central Manitoba gold mine tailings deposit
Barbara L. Sherriff, Ian J. Ferguson, Michael W. Gupton, Jamie F. VanGulck, Nikolay Sidenko, Caius Priscu, Marco Pérez-Flores, and Enrique Gómez-Treviño

Field variable-head test in low-permeability materials: Assessing the effects of trapped gas pocket and cavity expansion
Robert P. Chapuis

Direct measurement of matric suction in triaxial tests on early-age cemented paste backfill
Paul Simms and Murray Grabinsky

Development of a technically defensible soil gas sampling strategy for vapour intrusion assessments
Tai T. Wong and John G. Agar

X-ray Computed Tomography study of the influence of consolidants on the hydric properties of sandstones for stone conservation studies
Vicente G. Ruiz de Argandoña, Lope Calleja, Ángel Rodríguez-Rey, Luis Miguel Suárez del Río, Carmen Celorio

Porosity and microstructure characterization of building stones and concretes
V. Cnudde, A. Cwirzen, B. Masschaele, P.J.S. Jacobs

The use of X-ray tomography in the study of water repellents and consolidants
V. Cnudde, P. Dubrueil, K. De Winne, I. De Witte, B. Masschaele, P. Jacobs, E. Schacht

Microfocus X-ray computed tomography analysis of corroded glass objects
Florias Mees, Etienne Cornelis, Patric Jacobs, Maria Teresa Doménech Cárbo, Hannelore Römich

A rapid method for converting medical Computed Tomography scanner topogram attenuation scale to Hounsfield Unit scale and to obtain relative density values
Mathieu J. Duchesne, Francis Moore, Bernard F. Long, Jacques Labrie

Litho- and biofacies analysis of postglacial marine mud using CT-Scanning
Marie Gagnoud, Patrick Lajeunesse, Gaston Desrosiers, Bernard Long, Suzanne Dufour, Jacques Labrie, Florian Mermillod-Blondin, Georges Stora

Analysis of small-scale heterogeneity in clastic rocks by using computerized X-ray tomography (CT)
Janos Geiger, Zoltan Hunyadfalvi, Peter Bogner

Dual-energy X-ray computer axial tomography and digital radiography investigation of cores and other objects of geological interest
M. Iovea, G. Oaie, C. Ricman, G. Mateias, M. Naeau, S. Szobotka, O.G. Duliu

CAT-scan analysis of sedimentary sequences: An ultrahigh-resolution paleoclimatic tool
Guillaume St-Onge, Bernard F. Long

Comparison of Positron Emission Tomography and X-ray radiography for studies of physical processes in sandstone
Patrick Goethals, Anneke Volkert, Patric Jacobs, Staf Roels, Jan Carmeliet

X-ray CT and hydraulic evidence for a relationship between fracture conductivity and adjacent matrix porosity
Geomechanics and GeoEngineering

No new issue published
Probabilistic Seismic Hazard Analysis for Rock Sites in the Cities of Abu Dhabi, Dubai and Ra’s Al Khaymah, United Arab Emirates
By G. Aldama-Bustos, J.J. Bommer, C.H. Fenton, and P.J. Stafford

A Fuzzy Set Based Approach for Integration of Thematic Maps for Landslide Susceptibility Zonation
By D.P. Kanungo, M.K. Arora, S. Sarkar, and R.P. Gupta

Reliability Analysis of Soil Nail Walls
By G.L. Sivakumar Babu and Vikas Pratap Singh

Book Review
By P.H. van Gelder

Ground improvement techniques for railway embankments
Arulrajah, Abdullah, Bo, Bouazza

Influence of salts on strength of cement-treated clays
Modmoltin, Voottipruex

Small-scale micropiles to control heave on expansive clays
Nusier, Alawneh, Abdullatit

Validity of Menard relation in dynamic compaction operations
Ghassemi, Pak, Shahir

Discussion: Design of jet-grouting cut-offs
Croce, Modoni
Experimental and theoretical investigation of the high-pressure behavior of concrete
Martin J. Schmidt, Oana Cazacu, Mark L. Green

A small-strain overlay model
T. Benz, P. A. Vermeer, R. Schwab

Finite elements modelling of the long-term behaviour of a full-scale flexible pavement with the shakedown theory
Cyrille Chazallon, Fatima Allou, Pierre Hornych, Saida Mouhoubi

Optimization framework for calibration of constitutive models enhanced by neural networks
Rafał F. Obrzud, Laurent Vulliet, Andrzej Truty

Theoretical investigation of the effects of consolidation on contaminant transport through clay barriers
T. W. Lewis, P. Pivonka, D. W. Smith

Non-coaxiality and stress-dilatancy rule in granular materials: FE investigation within micro-polar hypoplasticity
Jacek Tejchman, Wei Wu
Time-Dependent Mechanical Behavior of a Granular Medium Used in Laboratory Investigations
Hani Ghiabi and A. P. S. Selvadurai

Torsional Waves in Self-Reinforced Medium
A. Chattopadhyay, S. Gupta, S. K. Samal, and V. K. Sharma

Predicting the Uniaxial Compressive Strength and Static Young's Modulus of Intact Sedimentary Rocks Using the Ultrasonic Test
Z. A. Moradian and M. Behnia

Two-Dimensional Discrete Element Theory for Rough Particles
Mingjing Jiang, Serge Leroueil, Hehua Zhu, Hai-Sui Yu, and Jean-Marie Konrad

Finite-Element Modeling of Cementitiously Stabilized Beams Using a Smeared Fracture Approach
Musharraf Zaman, Naji Khoury, and Pranshoo Solanki
Technical Papers

Method for Evaluation of Depth of Wetting in Residential Areas
Kenneth D. Walsh, Craig A. Colby, William N. Houston, and Sandra L. Houston

Predicted Loads in Steel Reinforced Soil Walls Using the AASHTO Simplified Method
Richard J. Bathurst, Axel Nernheim, and Tony M. Allen

Quality of Conventional Fixed Piston Samples of Norwegian Soft Clay

Analysis of Lightweight Deflectometer Test Based on In Situ Stress and Strain Response
Michael A. Mooney and Patrick K. Miller

Analysis of a Large Database of GCL-Geomembrane Interface Shear Strength Results
John S. McCartney, Jorge G. Zornberg, and Robert H. Swan, J.

Particle Network Model for Simulating the Filtration of a Microfine Cement Grout in Sand
Yun Sung Kim and Andrew J. Whittle

Integrity Problem of Large-Diameter Bored Piles
Yue Choong Kog

Performance of Long-Driven H-Piles in Granitic Saprolite
Arthur K. O. So and Charles W. W. Ng

Experimental Characterization of Dynamic Property Changes in Aged Sands
Yu-Hsing Wang and King-Yuen Tsui

Cyclic Behavior of Fine-Grained Soils at Different pH Values
Ivan B. Gratchev and Kyoji Sassa

Mechanical Characterization of an Artificial Clay
A. Turan, S. D. Hinchberger, and M. H. El Naggar

Bayesian Model Calibration Using Geotechnical Centrifuge Tests
L. L. Zhang, W. H. Tang, and L. M. Zhang
Technical Notes

Strain-Rate Effects in Mexico City Soil
J. Abraham Díaz-Rodríguez, J. José Martínez-Vasquez, and J. Carlos Santamarina

Discussions and Closures

Discussion of “Evaluation of Cyclic Softening in Silts and Clays” by Ross W. Boulanger and I. M. Idriss
P. K. Robertson

Closure to “Evaluation of Cyclic Softening in Silts and Clays” by Ross W. Boulanger and I. M. Idriss
Ross W. Boulanger and I. M. Idriss
