*The Mechanics and Velocity of Large Landslides
Edited by Christophe Bonnard, Lyesse Laloui, Claudio Scavia and Marta Castelli

Preface

Mechanics and velocity of large landslides
Marta Castelli, Claudio Scavia, Christophe Bonnard, Lyesse Laloui

Research papers: Mechanics of slow-moving landslides

Observations and predictions of the behaviour of large, slow-moving landslides in schist, Clyde Dam reservoir, New Zealand
D.F. Macfarlane

Behavior of a landslide prior to inducing a viaduct failure, Caracas–La Guaira highway, Venezuela
Daniel A. Salcedo

Geomechanical studies on slow slope movements in Parma Apennine
Andrea Segalini, Gian Paolo Giani, Anna Maria Ferrero

Geophysical investigation of a large landslide in glaciolacustrine clays in the Trièves area (French Alps)
D. Jongmans, G. Bièvre, F. Renalier, S. Schwartz, N. Beaurez, Y. Orengo

Mechanics and velocity of the Lärchberg–Galgenwald landslide (Austria)
Rainer Poisel, Hans Angerer, Max Pöllinger, Thomas Kalcher, Harald Kittl

Research papers: Mechanics of rapid-moving landslides

The role of rock fragmentation in the motion of large landslides
T.R. Davies, M.J. McSaveney

The Thurwieser rock avalanche (Italian Alps): Description and dynamic analysis
Marina Pirulli

Buckling of high natural slopes: The case of Lavini di Marco (Trento-Italy)
Paolo Tommasi, Luca Verrucci, Paolo Campedel, Luigi Veronese, Elena Pettinelli, Renato Ribacchi
Surface energy is not one of the energy losses in rock comminution
M.J. McSaveney, T.R. Davies

Research papers: Methods allowing the assessment of the future landslide velocity
Identification of mechanisms for landslide type initiation of debris flows
G. Klubertanz, L. Laloui, L. Vulliet

Modelling of fast catastrophic landslides and impulse waves induced by them in fjords, lakes and reservoirs
M. Pastor, I. Herreros, J.A. Fernández Merodo, P. Mira, B. Haddad, M. Quecedo, E. González, C. Alvarez-Cedrónand, V. Drempetic

Numerical modelling of entrainment/deposition in rock and debris-avalanches
G.B. Crosta, S. Imposimato, D. Roddeman

Flow experiments with gravel and blocks at small scale to investigate parameters and mechanisms involved in rock avalanches
I. Manzella, V. Labiouse

Publisher's note
Post-face — Research needs
Marta Castelli, Claudio Scavia, Christophe Bonnard, Lyesse Laloui
Research papers
The influence of shallow landslides on sediment supply: A flume-based investigation using sandy soil
G. Acharya, T.A. Cochrane, T. Davies, E. Bowman

GIS-based assessment of risk due to salt mining activities at Tuzla (Bosnia and Herzegovina)
F. Mancini, F. Stecchi, G. Gabbianelli

Probabilistically based seismic landslide hazard maps: An application in Southern California
Gokhan Saygili, Ellen M. Rathje

Landslides triggered by the 1949 Khait earthquake, Tajikistan, and associated loss of life
Stephen G. Evans, Nicholas J. Roberts, Anatoli Ischuk, Keith B. Delaney, Galina S. Morozova, Olga Tutubalina

An empirical model for estimating hydraulic conductivity of highly disturbed clastic sedimentary rocks in Taiwan
Cheng-Yu Ku, Shih-Meng Hsu, Lin-Bin Chiou, Gwo-Fong Lin

Investigation of fractal distribution law for the trace number of random and grouped fractures in a geological mass
Yangsheng Zhao, Zengchao Feng, Weiguo Liang, Dong Yang, Yaoqin Hu, Tianhe Kang

Compressive strength and microstructural analysis of unfired clay masonry bricks
J.E. Oti, J.M Kinuthia, J. Bai

Geological and hydrogeological environment in Shanghai with geohazards to construction and maintenance of infrastructures
Ye-Shuang Xu, Shui-Long Shen, Yan-Jun Du

Influence of dissolution on the mechanical behaviour of saturated deep argillaceous rocks
Adrien Haxaire, Irini Djeran-Maignre

Numerical modelling of in situ behaviour of the Callovo–Oxfordian argillite subjected to the thermal loading
Y. Jia, H.B. Bian, G. Duveau, K. Su, J.F. Shao
Integrated investigations of karst phenomena in urban environments
Jannis Epting, Peter Huggenberger, Lukas Glur
Geomechanics and Geoengineering
