Full-Time Faculty Positions in Civil Engineering

The Department of Civil Engineering at the Faculty of Physical Sciences and Mathematics (FCFM) of the University of Chile invites applications for full-time faculty positions in Civil Engineering, starting no later than during the second semester of 2015. Applicants with research interests in the following areas:

- Geotechnical Engineering (2 positions)
- Structural Engineering and Materials (2 positions)
- Water Resources and Environmental Engineering (2 positions)
- Transportation Engineering (2 positions)

will be considered. Responsibilities of the selected applicants will include: developing an externally funded, internationally recognized research program; teaching at the undergraduate and graduate levels; supervising graduate student research; and establishing links with the industry and public agencies.

Academic hierarchy and starting salary will be assigned based on the candidate’s academic qualifications. For further information please contact Ricardo Herrera at riherrer@ing.uchile.cl (Structural Engineering and Materials and Geotechnical Engineering), Aldo Tamburrino at atamburr@ing.uchile.cl (Water Resources and Environmental Engineering), or Cristian E. Cortes at ccortes@ing.uchile.cl (Transportation Engineering).

To submit your application, visit the website http://www.uchile.cl/concursoAcademico and search for reference numbers FM1501, FM1502, FM1503, FM1504, and FM1505.

Please, submit a complete package including CV, proof of academic and/or professional degrees, three recommendation letters from experts in the academic field, a brief research and teaching plan for undergraduate and graduate level, and copies of the three most relevant publications.

DESIRED SKILLS AND EXPERIENCE

The applicants must possess a PhD degree (at the moment of joining the faculty), and a demonstrated ability and commitment to excellence in independent research and teaching in the area of application. Fluency in Spanish language is not a requirement but the selected applicants will be expected to be able to teach in Spanish after a few semesters.
ABOUT THE EMPLOYER

The University of Chile is the largest research institution in Chile and one of the leading universities in South America. The Faculty of Physical Sciences and Mathematics (FCFM) develops research and teaching activities in basic sciences (physics, mathematics, biology, chemistry and geology) as well as in nine fields of engineering, thus providing an excellent environment to perform cutting edge research on multidisciplinary problems. The Department of Civil Engineering has traditionally prepared engineers who after graduation fill the high ranks of (or take leading roles in) public agencies and private companies, and the quality of its teaching and research is periodically recognized in national and international rankings.

The FCFM has affirmative action policies in place to increase the number of women in academic positions.

The University of Chile is located in Santiago, the country’s capital, which offers a variety of cultural activities, has a mild and sunny weather, and it is located within one hour from both the imposing Andes Mountains and the Pacific Ocean.
